DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/07 has been entered.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19,21,24-25, 27 and 30-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Hsu et al., US 6,847,405.

In considering claims 19, 25 and 31,

a) the claimed pixel information storing unit...is met by memory 104 and or 106 (Fig 1).

b) the claimed a reference pixel motion information generating unit...is met where the system determines the extent of motion being in the vertical direction or not (Fig 2, between pixel d and c) and the calculation on the horizontal motion or not between pixel a and b (Fig 2)

c) the claimed reference pixel motion information storing unit...is met where the data is stored in memory 104 and/or 106 (col 6, line 43-49).

d) the claimed interpolation pixel determining unit...is met where the system determines the interpolation coefficient/method of interpolation based upon the motion information in the vertical and horizontal direction in order to perform either spatial (for fast moving scenes) or temporal interpolation (for still video scenes)(see col 5 line 57 to col 6 line 49 for description of Fig 2), using the pixel level motion strength interpolation of the field as shown (col 6, equation, lines 30-35).

In considering claims 21, 24, 27 and 30,

Hsu discloses the determination of motion when motion is large (indicative of motion) or small (i.e. still) based upon the vertical direction (same field, above/below) and horizontal direction (previous, next field, same line as target/interpolated pixel, Fig 2).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure—see newly cited references on attached form PTO-892.

The tools currently available in the Patent EBC are Patent Application Information Retrieval (PAIR) and the Electronic Filing System (EFS).

PAIR (<http://pair.uspto.gov>) provides customers direct secure access to their own patent application status information, as well as to general patent information publicly available. EFS allows customers to electronically file patent application documents securely via the Internet. EFS is a system for submitting new utility patent applications and pre-grant publication submissions in electronic publication-ready form. EFS includes software to help customers prepare submissions in extensible Markup Language (XML) format and to assemble the various parts of the application as an electronic submission package. EFS also allows the submission of Computer Readable Format (CRF) sequence listings for pending biotechnology patent applications, which were filed in paper form.
